

 Clean Spectra

Hako

High performance maintenance pads for general purpose floor care

Clean Spectra floor care pads help create a cleaner, polished and high gloss finish to your floors helping to reduce the risk of slips and trips. The pads uniquely combine polycrystal abrasive particles into a range of hard wearing, washable fibre pads. Available to use on all Hako Scrubber Drier machines and suitable for all hard floors.

enquiries@hako.co.uk | 01788 825 600 | www.hako.co.uk

Typical application

- Suitable for all floor types, all floor care tasks and all Hako floor cleaning and polishing machines
- **1: Red (Coarse):** For deep cleaning, removing deep scratches and stains to leave a clean and well-prepared surface
- **2: Orange (Medium):** For scrubbing, to remove small scratches and leave a matt finish
- **3: Blue (Fine):** For floor maintenance, to leave a satin finish
- **4: Pink (XFine):** For polishing, burnishing or daily cleaning, to leave a mirror finish. Used daily, the clarity and shine of the floor will increase and remain longer.

Available for

- All Hako scrubber dryer machines
- Single disc machines with 150-400 RPM
- Orbital machines
- High-speed burnishers up to 3000 RPM (Pink XFine pad only).

Easy maintenance

Simply rinse the pads thoroughly with water after every use.

Pad shapes

Available in most shapes and sizes.

Other types of pad are available in the **Clean Spectra** range. Please contact us on **01788 825 600** for more information.

Features and benefits

- Eco-friendly. Using water only to clean and polish floors
- Achieve a higher clarity and gloss with less time and effort
- Provides a more slip-resistant floor after cleaning
- Increased lifespan through the use of polycrystal abrasives
- Save on consumables, time and labour compared with traditional floor pads.

What's the difference between Clean Spectra pads and conventional floor pads?

 Clean Spectra

The biggest difference is Clean Spectra polycrystal pads use only water to clean and polish your floor. They also leave a longer lasting shine compared to fibre pads.

Available as a complete kits or individual pad types.
